Arctic Collaborative Environment (ACE)

**System and Software Requirements**

ACE operates with Windows XP, Windows 7, Mac OS X 10.6, 10.7, 10.8 (snow leopard, lion, mountain lion).

ACE works with Firefox, Google Chrome, Internet Explorer 9

Users should ensure that Google Earth plugin is installed and operates in their browser, please visit: [http://www.google.com/earth/explore/products/plugin.html](http://www.google.com/earth/explore/products/plugin.html)

Users should enable javascript and allow cookies. Javascript and cookies are normally enabled and no action is required.

Users should set up at least two of the browsers on their machines.

**Internet Access**

Users should have the ability to add a wireless network to their system. The public (open; no password required) wireless network is called "GI Wireless". No physical network connections will be available; wireless only.

**Accounts**

Users may register with the ACE system prior to the event by visiting, [http://ace.arsc.edu/](http://ace.arsc.edu/), and clicking on the “Register” link at the upper right hand portion of the web page. Users that already have accounts do not need to “Register” with the ACE system.

**Questions**

Any questions about these technical requirements may be sent to Rob Cermak of the Arctic Region Supercomputing Center: cermak@alaska.edu

**Linux**

A linux/unix laptop may be used, but will lack the ability to use the Google Earth plugin to display data and information in the 3D Globe viewer.
