TRIM: ACE Tool Development for Education Applications

By Cathleen Geiger
Sea Ice Geophysicist
Department of Geography
9 September 2013
OUTLINE
1) Convey Concepts
2) Express Ideas
3) Need Your Feedback
Traditional Outreach Photos
Imagine ....

- At ONE website
  - SmartBoard access to weather, field conditions, YouTube videos, satellite imagery, photographs
  - Catalog with user defined categories
  - Scheduled times where you can chat/talk with people in the field and ask them questions
Consider Questions Like ....

What does sea ice sound like?
Interesting outreach photo.....

...... but is there a better way to make this more engaging?
Looking for teachers and educators willing to test out these concepts

Is there interest to consider an educational workshop using ACE?
